

Teacher Guide & Answer Key

60 SECONDS TO READY

01 ANSWER KEY

QUICK REFERENCE

VOCABULARY

1 – C 2 – E 3 – A 4 – D
5 – B

TRUE OR FALSE

1 T 2 F 3 T 4 F 5 T

LANGUAGE IN CONTEXT

1 tutor 2 adapt 3 rely 4 skill
5 honest

CRITICAL THINKING · WHERE IS THE LINE?

There is no answer key here — the THINK ABOUT THIS column is the lesson. Line 1 is nearly always OK and line 5 nearly always cheating, so the argument lives in the middle three. The translation line usually splits a class hardest, and it is worth asking whether the answer changes for a student who is new to the country. If a group marks everything OK, ask what the teacher is actually grading. If a group marks everything cheating, ask whether a dictionary is cheating too.

02 TEACHER GUIDE

BEFORE CLASS

AIM

Talk about how students use AI to learn, and give a simple opinion with a reason.

LENGTH

45–60 minutes.

READING SUPPORT

Play the audio once with books closed, then read again in pairs, one paragraph each. The five bold words are the five vocabulary words — point this out before students start.

WATCH FOR

Rely needs its preposition: *rely on something*. *Adapt* is abstract — teach it with a phone screen that gets brighter and darker. Students often say “~~I am agree~~” — model / *agree*.

EXTENSION

In pairs, write the AI rule your own class should follow, in one sentence.

03 DISCUSSION NOTES

GUIDE THE TALK

STUDENTS MAY MENTION

homework help · translation · fast answers · no waiting · wrong answers · lazy habits · exams · patience

SENTENCE FRAMES

- I think it is OK / not OK, because...
- A machine can... but a teacher can...
- When I study, I usually...

FOLLOW-UP QUESTIONS

- Does AI ever give you a wrong answer? How do you know?
- Is a translation app different from an AI tutor?
- Who should write the rules — teachers or students?

IF THE TALK STOPS

Give one minute of silent thinking time and let students write two words first. At this level the ideas are there before the sentences are.

04 MODEL WRITING

SAMPLE ANSWER

I think students should use AI, but only in the right way. It is like a **tutor** at home. You can ask a question at ten o'clock at night, and it can **adapt** and explain the idea again in a different way.

But you must not **rely** on it for everything. If the machine writes your essay, you do not learn the **skill**. So I think students should use AI to understand, not to finish the work, and they should be **honest** with the teacher about it.
