How can clothes be so cheap?

A five-dollar T-shirt looks cheap. But somebody, or something, pays the rest.

Cheap clothes wear out quickly and end up on big piles of waste.

WARM-UP

Talk about the questions with a partner.

1. When did you last buy clothes? What did you buy?
2. What is more important: price, quality or style?

USEFUL LANGUAGE

Last month I bought...
For me,... is more important.

A new T-shirt for the price of a cup of coffee. It sounds like a very good deal. In fast-fashion shops, new clothes arrive almost every week, and the prices are very low. But that five-dollar shirt has another cost, and it is not on the price tag.

Fast fashion means clothes that are designed, made and sold very quickly. To keep the price low, a **factory** must work fast and pay small wages. The cloth is cheap, so the **quality** is low. A shirt can lose its shape after five washes, and then it does not **last** another season.

The numbers are surprising. One cotton T-shirt can use about 2,700 liters of water. That is enough drinking water for one person for three years. And every second, somewhere in the world, a truck full of old clothes is burned or buried. Fashion is now one of the dirtiest industries on the planet.

But this can change. More people now buy **second-hand** clothes, or repair the clothes they already have. Some people ask a **brand** a simple question: who made this, and were they paid fairly? Ten shirts you love can be better than a hundred that fall apart.

If a T-shirt costs only five dollars, who is paying the rest?

DISCUSSION

USEFUL LANGUAGE I think... · For me... · because... · It depends.

- 1 Do you buy clothes often? Why do you buy something new?
- 2 Do you ever buy second-hand clothes? How do you feel about them?
- 3 Why do people buy clothes they do not really need?
- 4 Whose problem is fast fashion: the shops, or the shoppers?
- 5 Ten good shirts or a hundred cheap ones? Which do you choose?

01 CRITICAL THINKING

THE PRICE TEST

Five white T-shirts. The same shirt. Only the price and the story are different.

Choose alone first. Mark every shirt **BUY**, **NOT SURE** or **NO**. Then compare in your group.

PRICE	WHAT YOU KNOW ABOUT IT	BUY	NOT SURE	NO
\$4	Fast fashion, new styles every week. Nobody will tell you where it was made.	☐	☐	☐
\$0	Your brother does not want it. It is free, but it is not new.	☐	☐	☐
\$8	Second-hand, from an app. A stranger wore it twice.	☐	☐	☐
\$28	Organic cotton, much less water. It costs more, but it lasts for years.	☐	☐	☐
\$45	Fair trade. You can read what the workers were paid.	☐	☐	☐

YOUR NUMBER The most you would really pay: \$_____ Your group's highest: \$_____

- DISCUSS**
- 1 Is your number what you believe, or what you can pay?
 - 2 Compare with another group. Would you pay more if the label named the factory?

02 LANGUAGE IN CONTEXT
