1 F 2 T 3 T 4 F 5 T

LANGUAGE IN CONTEXT

1 rely 2 adapt 3 accessible 4 integrity
5 personalized

CRITICAL THINKING · WHERE IS THE LINE?

No correct column — the disagreement is the lesson. Almost every group agrees fast on the grammar fix (fine) and the unread submission (cheating), then stalls on the translation row and the outline row. The useful trap: a group that rules “AI must not produce any words” has just banned the grammar fix, and a group that rules “it is fine if you understand it” has just permitted almost everything. Ask what a teacher could actually detect — students usually realize the rule they want is unenforceable, which is exactly the problem schools have.

02 TEACHER GUIDE

BEFORE CLASS

AIM

Discuss the benefits and risks of AI in education and express a balanced opinion.

LENGTH

45–60 minutes.

TIP

Put students in groups of three or four and make them commit to a column for every row. Anything marked GRAY needs a stated condition out loud.

EXTENSION

In pairs, write one AI rule their school should adopt tomorrow.

03 DISCUSSION NOTES

GUIDE THE TALK

STUDENTS MAY MENTION

personalized help · 24/7 access · cheating & plagiarism · losing basic skills · saving teachers' time · the human touch

FOLLOW-UP QUESTIONS

- Is AI-written homework cheating?
- Could AI ever replace a teacher?
- What should schools never let AI do?

ENCOURAGE THIS LANGUAGE

“On the one hand... on the other...” · “It depends on...” · “I’d argue that...”

04 MODEL WRITING

SAMPLE ANSWER

Students should be allowed to use AI for their schoolwork, but with clear limits. Used well, these tools are genuinely helpful. They are **accessible** at any hour, and they can **adapt** to each learner, offering **personalized** practice that a busy teacher cannot always give. For shy students, asking a machine can feel safer than asking in class.

The danger is **integrity**. If a student simply lets AI write the essay, little real learning happens, and they may come to **rely** on it for thinking they should do themselves. The answer is not to ban the technology but to teach good habits: use AI to check and explain, never to replace your own ideas. Handled this way, it can support learning rather than weaken it.
